W. A. WADE, Publisher.

SATURDAY, AUGUST 19, 1882.

In the eighth district democratic congressional convention, held in Huntingdon this week there were four hundred delegates. A. W. Sto- linge that of cotton. The most revall, of McNairy, was chosen chairs markable feature of the new plant is man, and T. C. Long of Madison secretary. The candidates before the convention were Gen. A. W. Campbell and B. A. Euloe, of Madison, and Capt. J. M. Taylor, of Henderson. Mr. Champion withdrew from the race. The ballotings continued until Thursday morning, when Taylor was, on motion of the Madison delegation, nominated by acclamation. Enloe was supported solidly by Carroll and parts of other counties until the 173d ballot. On the 176th his name was withdrawn. Gen. Campbell's name was withdrawn on the 189th ballot, after receiving the solid vote of his county and parts of others. Capt. Taylor is the present state senator from his district and is one of the ablest men in his county. He is very popular, and will win by a rousing

A gentleman who has recently traveled through Henderson and Chester counties informs us that he made special inquiries as to Fussell's strength in those counties. He did not meet a single man in his favor, and did not hear of one dozen. This seems to be a fair indication of how the democracy will vote nearly all over West Tennessee. The feeling is nearly unanimous for Bate.

majority.

Senator Ben Hill died at his residence in Atlanta last Wednesday morning. He died peacefully and without a struggle. His last words were "Almost Home." Mr. Hill was one of the ablest of our southern statesmen, and bolder than any of them. His loss to the whole country, and especially the south, is very great.

Pronounce it Kee-dee-vee. - Milan

Exchange. Not so, Brother Wade. Col. S. H. Lockett, of the University of Tenneseee, who was for some time an officer in the Egyptian army, says it is cerrectly pronounced Kee-deeve.— Southern Lumberman.

Well, well, great men will differ.

The yellow fever at Brownsville, Texas, is increasing in virulence, and fears are entertained that it will spread through Texas. Montgomery, Ala., has quarantined against Pensacola, Fla., on account of some suspicious cases.

The approaching convention of the National Cotton Planters' Association, at Little Rock, Ark., on October 16th, 1882, promises to be one of the largest and most important ever held by the Association.

A list of appointments have been made for discussion between Hawkins, Fussell and Beasley. Gen. Bate is willing to meet Harwkins in debate, but will not make joint apdointments with the other candidates.

Hon. Robert L. Taylor was nominated by the democratic congressional convention of the first district last Monday at Morristown.

Senator Jackson and Col. Eb. James will address the people of Paris to-day. Mr. Fussell is also expected to be present.

The wire to fence a forty acre field costs about \$100-\$50 for the wire, and \$50 for the protection.

The democratic congressional convention will be held in Memphis September 20th.

The Natal Twin Association has been organized in Nashville.

A New Variety of Cotton Plant.

Mr. Arms A. Suber, a merchant of East Macon, (Ga.,) has succeeded after year of experimenting in producing a new cotton plant, hybridizing the wild cotton which grows along the banks of the Calloosahatchie river, in Floris da, and the common okra. The re sult of this cross gives a plant, the stalk of which grows two feet in height, and resembles the okra, its fothe fruit, which appears as a flower on the top of the stalk. Its size is as large as the magnolia, and resembles it in shape and color. After two days it changes to a light pink color, and falls off, then the boll forms. This is not unlike the common cotton boll, except that it attains an immense size, the list inside being held by the sharp points of the hull until picked. The lint, of which there is from one to two pounds in each boll, is seedless, and of long staple.

Mr. Suber offers to give any information of his wonderful plant to persons desirous of investigating the matter more fully.

That such a phenomenal plant, if it can be cultivated successfully, is worthy of attention is beyond question, as the face stated above point to the abolition of the graning process, an increase in the quantity of staple and facilities for gathering it.

#### Free Trade Increases Wages.

Wages in England have advanced since the adoption of free trade in 1846 nearly fifty per cent. The wages paid in Great Britian are sixty per cent. bigher than in Germany. France, Spain and other countries where trade is fettered by protective tariffs. Nothing operates in this country to prevent a reduction of wages to this European standard except the cheapness of land and the rivalry of employment in unprotected industries. The factory hands in New England are not much better paid than in Old England-Philadelphia Record.

Chicago Times: The protective tariff was to accomplish glorious things for the worker in iron. But wherein is he better off under sich a system of spoliation than if the tariff were for revenue? His labor is no more protected than that of a carpenter, or barber, or teamster. And, wken the prices he pays are taken into consideration, he enjoys no higher wages than the English worker in iron. The iron masters, not the iron workers, are the real beneficiaries of the protective system.

The Arkansas Gazette wants to know why the meat packers of the West cannot get the salt they use to preserve their meat free of duty, as the fishermen of New England get the salt free of outy which they use to preserve their fish, and "we the people" want to know, you know, and that is why we are fanatics, or obviously bribed with British gold,

WOMAN.

Her Health and Life

Depend more on the regularity of her menstrual functions than on any or all causes combined. An actual or a living death is the inevitable result of derangement of a function which makes woman what she is in every respect, and especially in her mental and bodily constitution. Hence, immediate relief from such derangements is the only safeguard against wreck and ruin. In all cases of stop-page, delay, or other irregularity of the "courses," Dr. J. Bradfield's Female Regulator is the only sure remedy. It acts by giving tone to the nervous centres, improving the blood, and determining directly to the organs of menstruation. It is a scientific prescription, and the most intelligent physicians use it. Prepared by Dr. J. Bradfield, Atlanta, Ga. Price trial size, 75c., large size, \$1,50. For sale by all druggists.

40,000 Feet of Lumber for Sale. I have a large lot of Weatherboarding, Ceiling, Flooring, Scantling, etc., which I will sell cheap for cash. J. T. TUCKER.

Dr. J. BRADFIELD'S

### Female Regulator.

WOMAN'S BEST FRIEND.

It is well known to Physicians, and alas! too well known to suffering women themselves, that they are subject to numerous diseases peculiar to their sex, such as suppression of the Menses, pa aful and scanty Menstruation, Congestion, Ulceration and Falling of the Womb, attended with an endiess train of sympathetic and constitutional disorders, which embitters the whole life, and which nave long been considered as almost incurable. But at last the remedy has been found in

Dr. J. Bradfield's Female Regulator. It is not a "cure-all," but a remedy for one class of diseases, all of which pertain to the WOMB.

WOMB.

Any sufferer from the diseases mentioned can take this remedy, and thus relieve herself without revealing her condition to any one, and without subjecting her womanly modesty to the shock of an examination by a physician.

To bring health and happiness to the homes of suffering women is a mission before which royal favor sinks into insignificance. What earthly benefaction can compare with one which protects from

"That dire d'sease whose ruthless power

"That dire d'sease whose ruthless power Withers beauty's transient flower?"

Withers beauty's transient flower?"

which gives ease for pain, joy for sorrow, smiles for tears, the rose of health for the pailer of disease, the light elastic step for aragging weariness, nights of soft repose for heavy hours of tossing restles-ness, bounding visor for languishing duilness, the sweet lines of full grown beauty for the sharp and withered form of ematiation, a long life of mental, physical, social and domestic enjoyments for a few sad days of pain and gloom, ending in as early grave? Such is the mission, such are the results of Dr. J. Bradfield's France (Redulation, which is hence truly and appropriately styled "Woman's Best Friend."

"Whites" and all those irregularities of the Womb's destructive to the health, happinessand beauty of women, disappear like magic before a single bottle of this wonderful compound.

If who suffer from any of these diseasee are

pound.

If who suffer from any of these diseases are most ca neatly invited to give this great romedy a trial. It has cured thousands, and will cure you. Don't fail to try it.

# SAVE YOUR FRUIT

## It Can be Done, and Here is the Proof!

OPELIKA, LEE Co., ALA., May 18th, 1882.

OPELIKA, LEE Co., ALA., May 18th, 1882.

Mr. W. B. Callahan, of the firm of and business manager for Messrs. Tatum, Sims & O., proprietors of the Alta Fruit Preservative, is an honorable, reliable gentleman, who wouldn't conduct a fraudulent business. We have known him for years, and he is we thy the confidence of all persons.

P. E. BARNETT, TAX Assessor,
J. K. EDWARDS, Judge Probate,
W. C. ROBINSON, Clerk Circuit Court.

W. C. Romson, Clerk Circuit Court.

The following is from the Opelika Observer, May 18th, 1882.

"We have satisfied ourselves beyond all doubt that the "Alta Preservative" is all finit is claimed for, it. We will never advise our readers to patronize a worthless article. It claims to merit are based on nothing but truth. The proprietors are honorable, reliable gedienen, and their is nothing fraudulent about their business."

Let the doubting write to the Observer or any of the above gentlemen.
One dollar's worth of ingredients used in making the Preservative will save for lower than
12 months 10 bushels of fruit, grapes, green corn, tomatoes, &c., and ten cents wort'of ingredients will permanently prevent sourness, mold and fermentation in 20 gallons if syrous,
catsups, sauces, preserves, &c. Fruits, &c. are not to be cut, peeled, heated or can ed by our
method, and everything retains its natural tasts and quality, just as grown. We werent our
Preparation to give satisfactory results, and we willrefund the purchase money if failure occurs when used as directed. No trouble whatever to use.
This season we are selling recipes to make our preservation at only one dollar, and where
we have no agents we will send all applicants the form of obligations required afpurchasers
and upon a compliance with which, and receipt of price we will farward our recipe?
